Subject: RE: Calverton Local Green Spaces

Alan

In response to the Independent Examiner's question, to confirm:

- land north of Park Road – this is fully within the existing Green Belt, but will not be in the Green Belt if the emerging Gedling LPD is adopted
- land south of Crookdole Lane – this is fully within the existing Green Belt
- land west of Hollinwood Lane – this is fully within the existing Green Belt, and will remain in the Green Belt if the emerging Gedling LPD is adopted, assuming Gedling amend the boundary of the retained employment site in the emerging LPD to match that in the Neighbourhood Plan as they agreed (this is because the emerging LPD removes the retained employment site out of the Green Belt)
- land south of Dark Lane – this is fully within the existing Green Belt
- land to the east of Bonner Hill – this is fully within the existing Green Belt, the northern end (approx. a third from opposite the road Church Meadow to Main Street) is within the Conservation Area
- land south of Main Street – this is fully within the existing Green Belt, the northern end (approx. a quarter) is within the Conservation Area

For ease on the attached plan extract I've just made the Conservation Area Boundary stand out over the Local Green Space to try and assist.

Kind regards
Anthony
